The Microsoft iSCSI Software Initiator will enable the connection of a Windows host to an external iSCSI storage array using Ethernet NICs. This download can be installed on Windows Server 2003, Windows XP, and Windows 2000. For Vista and Windows Server 2008, the iSCSI initiator is included inbox. The Microsoft iSCSI software initiator makes it possible for businesses to take advantage of existing network infrastructure to enable block-based Storage Area Networks without having to invest in additional hardware. Description: Networking customers requiring Windows Server 2003 deployment are offered the options of Windows Server 2003 Standard, Windows Server 2003 Datacenter Edition, and Windows Server 2003 Enterprise Edition. These three editions differ in the number of features and options installed by default. Windows Server 2003 Standard and Datacenter Edition are bundled with the following services: * Microsoft Forefront Client Security (FCS) * Microsoft Forefront Threat Management Gateway Service (TMGS) * Microsoft Forefront Endpoint Protection (EPP) * Microsoft Exchange Server * Microsoft Windows Mail * Microsoft Windows Small Business Server (SBS) Windows Server 2003 Enterprise Edition includes the following features: * Microsoft Exchange Server 2010 * Microsoft Windows Server 2003 Enterprise Edition Clustering * Microsoft Windows Server 2003 Enterprise Edition Load Balancing Microsoft Exchange Server 2010 Microsoft Exchange Server 2010 is the first release of Exchange Server that runs natively on Windows Server 2008 and Windows Server 2008 R2. With Exchange Server 2010, Microsoft has been able to shrink the size of the Exchange Server binaries, make the Exchange Server code more robust, and improve the scalability of Exchange Server deployments. Microsoft Exchange Server 2010 provides the following new services: * Microsoft Exchange Server 2010 Hub Transport * Microsoft Exchange Server 2010 Hub Transport with SSL * Microsoft Exchange Server 2010 MAPI * Microsoft Exchange Server 2010 Unified Messaging * Microsoft Exchange Server 2010 Unified Messaging with IMAP Microsoft Exchange Server 2010 Hub Transport The Microsoft Exchange Server 2010 Hub Transport service is a reverse proxy for Exchange 2010 Server. It supports all protocols in the Transport Layer Security (TLS) 1.0, TLS 1.1, TLS 1.2, and IPSec protocols. The Exchange 2010 Hub Transport service provides the following new features: * Support for clients using mobile clients such as Blackberry and Windows Mobile * Bindings to multiple locations * Proxy support * Proxy-directed connection establishment Microsoft Exchange Server 2010 Hub Transport with SSL The Exchange 2010 Hub Transport service 70238732e0
