lic file can be moved to a backup server. The command completed successfully. Newer versions of Abaqus may be installed by running the installer file located on the DVD or online. This method also creates a.lic file. The.lic file is available in the same directory as the.inf file. This directory should also contain the correct version of the driver INF file. You may upgrade or upgrade to the version of Abaqus you wish to use. You can upgrade the licensed version of Abaqus to the latest version, or you can perform an upgrade of the license server to the latest version (note that this method is a server-based installation). The upgrade installs the newest version of Abaqus onto the license server, and keeps your license server running on the latest version. Note that the current license server is installed on your license server, but the.lic file is only located on the computer that will be running the software. To use the.lic file, ensure that it is installed in the same directory as the.inf file. ## See also * Chapter 2, _Running, Installing, and Upgrading Abaqus Simulia_, for more information on the file-based upgrade. * Chapter 3, _Getting Started with Abaqus_, for more information on the different versions of Abaqus, how to select a version, and how to run a license check. * Chapter 4, _Parameterized Mesh Generation with Abaqus_, for more information on how to configure the command parameters. * Chapter 6, _Mesh Analysis with Abaqus_, for more information on how to perform mesh analysis. * Chapter 10, _Mesh Modeling with Abaqus_, for more information on how to model a mesh using Abaqus. # Chapter 3.
