

Simply press the button on the camera or tablet and the feature will be enabled automatically without any software installation. This package installs the software (Bluetooth Software) to enable the following devices. Simply press the button on the camera or tablet and the feature will be enabled automatically without any software installation.Q:

How to send Json data through Http post I have a json string. I want to send it through http post. Here is my code: String jsonData =
"{"chassis":{"id":"1","name":"abcd"}}"; HttpClient
httpClient = new DefaultHttpClient(); HttpPost
httpost = new HttpPost(""); List nameValuePairs =
new ArrayList(); nameValuePairs.add(new
BasicNameValuePair("json",jsonData)); try {
httpost.setEntity(new
UrlEncodedFormEntity(nameValuePairs)); } catch
(UnsupportedEncodingException e) { // TODO Auto-
generated catch block e.printStackTrace(); }

```
    HttpResponse httpResponse =
    httpClient.execute(httpPost); HttpEntity httpEntity =
    httpResponse.getEntity(); is = httpEntity.getContent();
    BufferedReader br = new BufferedReader(new
    InputStreamReader(is, "iso-8859-1"), 8);
    StringBuilder sb = new StringBuilder(); String line =
    null; while ((line = br
```
