'I'll have a baby and I'll change my name.' Or, perhaps, "I'll do that big scary deep dive." Despite your fear, I will be right there with you. I'll help you. I'll be the best. I'll help you trust in the process. I'll help you celebrate. I'll help you see that you deserve to have a baby and that you'll probably be a great mom. I'll help you. Dying to know what it's like to have a baby? No worries. Visit parent.com/baby. What's your biggest fear? Tell us in the comments! I've been working on the perfect word, but still can't decide. So I thought I'd use my best word to tell you how much I appreciate your comment. I've been reading your blog for a while and am so happy to see that you're connecting with people and having fun doing it. Q: Is the title of "Leading term in a sequence" connected to the time function? I'm watching a YouTube video about the topic. And he said that the title was connected to the time function. So I'm confused. Can someone explain what he said? Thank you very much. A: As mentioned in the comments, I don't see him saying that; he's just offering the title to the first n terms of the sequence. Q: How to solve NullPointerException? I'm using the emulator for Android, a Samsung S5, and I'm following the instructions in Android Developer Guide to build a new Android project in Eclipse and it's doing the expected things. But when I run the project I get a NullPointerException in the first line of the main. This is the line where the exception is thrown: `TextView tv = (TextView) findViewById(R.id.text);` Here is
