Electrochemical deposition of nitrogen-doped C doped TiO₂ porous microspheres as novel adsorbents for efficient removal of organic dyes from water. An N-doped C-doped TiO₂ porous microsphere was prepared on an anodized aluminum substrate by using titanium-nitride-coated TiO₂ (TNCT) and ammonium carbonate (NH₄CO₃) as precursors. The microsphere was characterized by using scanning electron microscopy (SEM), X-ray photoelectron spectroscopy (XPS), X-ray diffraction (XRD), UV-vis spectroscopy and electrochemical measurement. The as-prepared microsphere shows good visible light-induced photocatalytic activity and can be used as a photocatalyst for the decomposition of methyl orange (MO) and methylene blue (MB) solution under visible light irradiation. Furthermore, the microsphere can be used to remove MO and MB solution in water effectively. The photocatalytic process is mainly governed by the photocatalytic efficiency of the photocatalyst and the adsorption effect of the microsphere. The adsorption effect is greater than that of the photocatalytic effect, which is attributed to the synergistic effect of the photocatalytic and adsorption property of the microsphere. The N-d

ChemCad Ver 6.0.1 From Chemstations With Crack CracQ: How do I add a number to a date and time and then convert it to a timestamp? I've tried researching on Google and this site but it can't seem to help. I'm trying to add 30 days and 3:15pm to a date and a time. I have tried the code below but i get errors. "> The errors are: date() expects parameter 2 to be long, string given in C:\xampp\htdocs\vijaya\code\library\contact\contact.php on line 20 Please use the date formating syntax to 3ef4e8ef8d
