PDF Standard Non-Proprietary Business Format See also ISO 4034 IEC 60479 IEC 60478 EN \*DIN Category:Mechanical standards Category:Springs (mechanical) Category:Standards of GermanyThe images sent to my devices with the username mfc, the pictures included on the site, the red thumbnails, are taken from my girlfriend's account. She gave her phone to her friend over a year ago and it stayed on her friend's account since then, the phone has been rooted for the past year by me. The last time I tried to connect to her account was yesterday and my phone can't connect to her account. Also if my phone connected to her account for a second I would have noticed a website not loading. I can't find a way to change her username on her account but her friends have the control to change her username. So if you go into her account you will be able to change the username back to mfc. The information from her phone is in the folder called C:\Users\mfc\AppData\Local\Android\Sdk\platform-tools I just want to make sure that the information isn't being sent to my devices with the same username as her friend. Did you try to use different passwords? If she changed the password on the account I would assume that it won't be connected to you anymore but not only you will be able to connect to her account if you reset her phone, the password will stay the same, she will have to change it again, possibly while using the phone, in that case you can stop the sending to her phone if you don't want to see her pictures.Design, Synthesis, and Biological Evaluation of 1-Naphthyl/Phenyl- and 2-Naphthyl/Phenyl-3-Amino-4-benzylidene-1,8-naphthalimide Derivatives as DNA Intercalators and Topoisomerase I Inhibitors. A series of 1-naphthyl/phenyl- and 2-naphthyl/phenyl-3-amino-4-benzylidene-1,8-naphthalimides (2-17) were synthesized and characterized by UV-vis absorption, <sup>1</sup>H NMR, <sup>13</sup>C NMR, and FT-IR 2d92ce491b
