A: 1. There's no better hash than MD5. 2. If you want to implement it yourself, you can use the code for MD5 listed in the Wikipedia article on MD5. 3. You'll need at least 2^{32} guesses to brute-force the hash. 4. If you happen to be running Windows, then, yes, md5crypt is the perfect software. CNS vascular injuries: utility of delayed computed tomography in children. To study the usefulness of computed tomography (CT) angiography in the evaluation of paediatric patients with occult vascular injury, focusing on the differential diagnosis of intracranial vascular injury. Forty-five children underwent head CT within 48 h after injury. All children underwent a follow-up CT after at least 6 weeks to evaluate the presence of an intracranial vascular injury. Twelve children had positive findings at both CT examinations. Of the 33 children with negative findings at the initial CT, 17 had delayed neurological deterioration and six had CT findings consistent with cerebral infarction. Of the six children with cerebral infarction, three had cerebral infarction on the initial CT and three had the development of new ischaemic infarctions on follow-up CT. Early CT angiography is not always useful to rule out intracranial vascular injuries, but can identify children with deteriorating neurological condition and those who develop new ischaemic infarcts after negative initial CT examinations. From where I sit, I hear my name echo. It seems to come from a point far away, but then, I'm not sure how many ways there are to be close by. I think of the ball I never touched in the lower yardage, so the ball barely moved. That felt like a loss to me. Then I hear my name, more clearly this time, from a different direction. I think of the ball that crossed over my head, and bounced back. That seemed like a win. Both sound to me like they were losses, and yet, I don't know if I want to tell that to someone. They sound like they were losses, but I don't know if I want to take someone else's opinion of them. And in the end, I don't know what difference it makes. Backyard football. Learning lessons. Losing. Gaining. Never losing. Never gaining. Sometimes, the game feels like a big distraction from my life. Sometimes 2d92ce491b
