Sami FTP Server Full Product Key For PC

The Sami FTP Server is a FTP server which is easy to use and stable. What makes the Sami FTP Server unique is its speed and reliability and it's use of a static "Sami FTP Server" configuration. The Sami FTP Server doesn't use regular HTTP requests or keep alive connections, but rather a direct connection to the FTP server which makes the server much faster. This means there is no need for an "offline" part of the Sami FTP Server, which has proven to be a serious problem for other FTP servers. The "Sami FTP Server" is distributed as a very light weight windows executable. With the "Sami FTP Server" you can easily share and offer files, images, music, documents and other files with up to four users simultaneously. You can also use the Sami FTP Server as a secure file sharing server or a secure web server. The Sami FTP Server supports any kind of encryption and the web interface doesn't require that you install any browser extensions. * Max. number of simultaneous connections: Up to 4 users * Performance: Speeds up to 700 MB/sec * File integrity check: Files can be transferred with integrity checked. * Speed: file transfers are done much faster than other FTP servers * Firewall friendly: FTP server can run over the internet without firewall issues. * User support: Support for any kind of file operations: FTP, HTTP, SSH, SMB, UPnP * Unlimited Connections: No registration required for unlimited connections. * Data integrity check: the server can check if a file was changed * Protection against modified files: the server will alert you if a file was changed * Encryption: Several encryption methods are supported * Installation: only a single file is to be installed on the server * Server administration: All server settings can be changed through the web interface * Web interface: The web interface supports most common browsers and is available through any browser * Extensive log files: You can view all server related events in a log file * Automatic Updates: The Sami FTP Server is supported with automatic updates. * Security: The server is secure, using SSL for the encrypted part of the communication * Protocol options: The Sami FTP Server supports multiple protocols. These include FTP, HTTP and SSH * Logging: The server logs all events in a log file. * Web interface: The web interface is available through any browser * Multi
