But also, if users want to add the song directly into the database from their hard drive or from a portable player, they can use the keymacro transfer option. More information is at [Effects of the magnetic properties of magnetic powder on the compaction properties of wet granules]. In this paper, the effects of the magnetic properties of magnetic powder on the compaction properties of wet granules were studied. The results showed that the following properties of the magnetic powder had effects on the compaction properties of wet granules: magnetization rate of magnetic powder (the initial magnetization rate is within 50-200 emu/g, if the magnetization rate is lower than 50 emu/g, the compaction properties of wet granules would be worse), coercive force of magnetic powder (the saturated magnetization is within 20-80 A/m, if the magnetization is lower than 20 A/m, the compaction properties of wet granules would be worse), and the number 1d6a3396d6
