

The latest version of the DIN standard sheet applies to all parts made according to DIN standards. ∅ Dimensional variations without tolerance values ∅ according to "DIN ISO...". The DIN standard does not establish dimensional deviations and does not take into account the influence of tolerances. However, DIN allows dimensional deviations between 1 μm and 0.1 mm. ∅ The DIN standard does not specify dimensional deviations and does not take into account the effect of tolerances. Depending on the dimensions of the DIN sheet, in some cases, up to two types of steel can be used. The use of such a sheet gives great design flexibility.
