Bitdefender Safepay

---

Bitdefender Safepay is a lightweight and efficient piece of software created to offer you the means of performing secure online transactions, preventing any online threat from targeting your payment details.

Straightforward and intuitive usage The first time you launch the utility, it will conduct a thorough analysis of your system in order to determine the existence of any form of malware that could potentially

---

put you at risk. When complete, you can begin working with Bitdefender Safepay, which will generate a protected environment in the form of a browser, where you can perform all transactions without a worry. Effortlessly protect yourself against the threats attacking electronic shops. The program enables you to access websites, not just e-shops, and make purchases, helping you stay on guard when it comes to identity

---

theft and phishing operations, by securing any information you transmit and preventing ill-intended individuals from accessing it. The virtual keyboard that Bitdefender Safepay provides you with adds a layer of security, by proactively handling the existence of keyloggers or other similar tools on your computer, useful particularly when you input your card details or other such information. From the

---

settings section of Bitdefender Safepay, you can manually configure which websites to allow popups on, as well as choose the scanning filters that you wish to apply when browsing the web (malware, phishing, fraud, untrusted, spam). Moreover, you can setup custom proxy preferences to further enhance your level of security. A handy tool for supplementary protection when shopping online To conclude,

---

Bitdefender Safepay is a reliable and user-friendly application aimed to help you stay at bay from any online dangers, quite suitable for you if you are in the habit of performing a lot of web transactions and wish to prevent anyone from targeting your payment data.
