Title : Print Multiple Web Pages Publisher : SilverPeak Technologies Description : Print Multiple Web Pages application allows you to extract the URLs from HTML files on your PC and then print them out. The software is extremely easy to use and doesn't require you to have any special skills or experience in working with it. Add the files you want to be printed to the list by double-clicking on them. The list can be as long as you want, with no limitations being imposed on it. While the list occupies a small segment of the UI, the browser emulation tab is slightly larger. What is this browser emulation? Simply put, it is a preview area that respects the original format of the pages. Before getting to the printing setup, one can also save all HTML items as a text document. This comes in handy when you have to postpone your work but prefer not to lose all HTML files previously loaded. Extracting URLs from text documents is a feature offered by the app and it will automatically pull URLs from the text files you have on your PC. For the print process, you are free to choose from any supported printer. The app is light on the memory and is responsive, being stable throughout the testing process.
