
Application X-msdownload How To Open

application x-ms how to open file in html? I have a .x-MS file which contains a link to a .doc file. I want to open this .x-MS file in HTML like below. For example if I click on this image This means that all elements of the x-MS file, including links, are in the HTML file. How can I make it so that all elements, including links, are not in the HTML file. I don't want it to be in HTML.

Please help me solve this problem. I think it's so simple, but I can't solve this problem
