Drawing and Data Integration: Unified Context-Sensitive Help: Help is context-sensitive, meaning that you can click on words or other objects in your drawings to go directly to help in a specific context, like a table of contents or an XML page for your drawing. For example, if you click on a table in your drawing and the text goes yellow, you can quickly learn about tables without having to watch a video or read a manual. (video: 1:15 min.) Combine the Context-Sensitive Help, the Unified Help, and the Auto-Complete Word Lists and Knowledge Graph to get the most context-sensitive help available in any drawing program. (video: 4:55 min.) Communicate from your designs to other AutoCAD users via Interop and Visio. Improved Application Compatibility: You can now move and resize the taskbar. The user interface on the right side of the taskbar is configurable and can be customized to your taste. You can also change the cursor type to match your preference.
