
Rocksmithnocablelauncher

[Download](#)

Run "NoCableLauncher" to play Rocksmith 2014 using your own audio interface! Note. If you want to change the settings again, you can simply open the ... \\Crack\\Profiles\\language\\en_RU.xml file and replace the DefaultColor line with Default. And you will see how the game has changed. If you want the game to start in English, you can simply replace DefaultColor with Default. This change will not affect the sound of the game; it will remain in English. Don't be surprised if the game doesn't automatically install Russian fonts! This is not what you asked for and Steam will only install them if you want them to and manually.
