The problem was not related to the game but with a cheat tool that was installed on some of the compromised computers, i.e., running the cheat tool was enough to give a negative effect on the game. A: 'Bought' in this context means 'loaded' or 'executed'. You bought the game (compiled binary) which contained the cheat engine used to modify the game. The cheat engine allowed users to change the default value, so that all flying happens at 9G, for example. It seems that the package/compilation you bought was modified by someone else and this was detected during the scan and removed from the package. A: To my knowledge, technically, the word "bought" is only used when referring to a product or service, such as buying a copy of the game, as in "Are you buying this game?" However, it would not be unusual to hear this usage as a hyperbole. For example, someone might describe having loaded the game cheat engine into the game, as in "I loaded cheat engine into the game." Q: Creating a friendly java app for different users I am developing a java application, and I have already seen some tutorial about how to implement security and protection. My program will be used by many users in order to have different users with different rights. Thus, I want to create in my program a system in which the user can authorize access to a specific domain with a kind of password, and an authorisation system in
