Internet Explorer Administration Kit Free Download

Internet Explorer Administration Kit is a software program whose main purpose is to aid people in customizing, deploying and managing Internet Explorer packages. Wizard-like GUI The installation process is a piece of cake, yet you should know that you are required to reboot your Pc. The interface you come across is constructed as a wizard, meaning that you are going to be guided every step of the way. Moreover, it means that you can learn how to handle Internet Explorer Administration Kit without any kind of issues, regardless of the experience you hold with computers. Moreover, there are also some Help files you can access and browse. Select output folder, language and OS First and foremost, you should know it is possible to select the location where the customized packages are going to be placed, as well as specify a INS file from which to import settings. The target platform can be selected from a drop-down menu, your choices being a Windows 8 or 7 system (86 or 64 bit), while you can also specify the target language and the kind of package you want. The latter refers to the fact that you can include installation of IE 10 in your final product. Add your items, customize button and title bars, and use proxy servers With the help of a file browser you can easily choose the items you want to add. Furthermore, it is possible to input the element's name, command, GUID, parameter, uninstall key, version and description, and you can select when to set them up (before or after IE's installation). Title bars, search providers, home page URLs, accelerators, Favorites and RSS Feeds can be added and customized, while you can also insert toolbar buttons with user-selected icons, actions and captions. Last but not least, you can enable proxy settings, use Internet Explorer's default welcome page and standards mode, and choose a new root certificate path from the hard drive. A final evaluation The computer's performance is not going to be hampered in any way as the product does not require a large amount of CPU and memory in order to function properly. The interface is dedicated to all user categories, the response time is good and there are sufficient options to keep you busy for quite a while. To sum up, Internet Explorer Administration Kit is a pretty efficient piece of software for those that want to create custom Internet Explorer packages.
