A novel plasmonic nanoparticle biosensor has been prepared by coating gold nanoparticles with a biodegradable synthetic peptide that is designed to selectively interact with the surface of bacterial cells. The peptide spontaneously unfolds to create a densely packed monolayer that exhibits a localized surface plasmon resonance band at ~540 nm that is red-shifted from the gold nanoparticle plasmon band. The biofunctionalized nanoparticles are shown to detect pathogenic bacteria in blood samples.Q: How to delete a folder using javascript I am trying to create a delete folder button from a datalist.The below is my datalist:
