Convert audio file from FLAC to WAV and MP3 Supported formats: WAV, MP3, OGG, FLAC Allows you to process batches of audio files Simple, yet user-friendly and easy to use Comes with a brief help file FreeQ: Linker command failed with exit code 1 when setting-up a project I am a beginner at coding, and when I tried to build a project, I got an error that states 'Linker command failed with exit code 1.' I used Xcode and downloaded the ASIHTTP library. I googled the error and found out that the error might be coming because of the 'system' library and I got this error after I added the library to the project. This is the line where I got the error: #include And this is the SystemConfiguration library that is causing the error: I don't have any idea how to fix this. When I uninstall the ASIHTTP library, the problem doesn't go away. I'm using Xcode 9 and MacOS 10.14 Mojave. Here are the steps that I took: Installed Xcode and downloaded the ASIHTTP library Opened the ASIHTTP library In Xcode, clicked on 'Open Files' Listed all the files and selected them Clicked on 'Open' Clicked on 'Add File to My Project' Searched on the path '/Users/Name/Library/Developer/Xcode/DerivedData/' and added the library After that, click on 'Add Files to ' Searched for 'SystemConfiguration/SystemConfiguration.h' Added the library there A: The first question is about what library is it. Where did you download it, and what is the path to the location on your computer where you placed it? In your case

[FLAC Ripper - Other Desktop Environment Versions](#) For those who cannot spend too much time tweaking the interface and the controls, FLAC Ripper also offers a desktop mode which is basically a basic GUI wrapper over the command-line version. For example, it is possible to compress FLAC files with a single command. The app also features the ability to see track information about imported FLAC files. The basic desktop version also supports batch processing with a couple of limitations: The app is unable to change settings or view multiple files simultaneously, and it cannot cut FLAC files. [FLAC Ripper - Mac OS X Version](#) FLAC Ripper is available as a standalone application for Mac OS X as well. The app does not support drag and drop to select FLAC files, and it comes with only a basic interface. Nevertheless, the Mac OS X version is able to cut FLAC files. In addition, FLAC Ripper supports ID3 tag editing for imported audio files. [FLAC Ripper - Windows 8 and 8.1 Versions](#) FLAC Ripper is also available for Windows users. There are two Windows versions of the app - for 32-bit and 64-bit systems. Though it offers a lot more functionality than the Mac OS X version, the default interface remains the same. Nevertheless, the app supports batch processing with some limitations. For example, the app can only display details for one FLAC file at a time, and it doesn't support multiple files. [FLAC Ripper - Windows 7 Version](#) With the release of Windows 7, FLAC Ripper received some new features. The desktop version of the software no longer supports batch processing, and the app is also unable to display track information for imported
