. 4.4.1. September 11, 2017 A small update 4.4.1 of "Diamond", our crystal and molecular structure visualization software, has just been released. In general, this update is more technical than conceptually new. However, I believe that it represents a significant shift in the evolution of our imaging technologies, and also allows us to advance into the future and introduce new opportunities for scientific research. First of all, this update adds a new visualization mode - "Spheroidal View" for crystalline structures. This mode allows you to create a more realistic model of crystalline and nanoparticles.
