Note Be sure to save your work. When you close a file in Photoshop, the last thing you do is save it. By default, you save a file by choosing File→Save, but if you're saving a file to continue working on it, save the file to a different name than the one you used when you last saved it. ## The Photoshop Work Area This is the area on the screen where you create and modify your images. After you close an image file, you see your image in the Photoshop window shown in Figure 5-8, but there's more to a photo. The image window's top and bottom areas (the canvas) show the "billboard" style of the image, which is where you work on it. A few important parts of the image work area appear in the bottom-left corner of the window (in this image): * **Main menu bar**_. The `_Main menu bar_` is the place where you start doing things and then later return to them. By pressing the ESC key or choosing Edit→Esc, you close the menu and close everything in the image window, and return to the main menu bar. * **Status bar**_. The `_Status bar_` tells you information about the image's current file status (name, size, type, etc.) and operations (cro

We will discuss the basics of the Gradient Tool to start creating unique patterns and designs on your images. You'll learn how to create your own unique style using the Gradient Tool. Get Started with the Gradient Tool First, we have to load an image to add to the canvas. You can select any image file you want from your computer's hard drive to add to the Canvas or Photoshop document. Let's start by creating the most basic gradient design. Gradient Effects vs. Gradient Patterns Most of the time, when a user of Photoshop or any Adobe software creates a new graphic, they use the Gradient Tool to create a gradient (using a solid color in the primary color of the gradient). However, you can also create gradients with patterns that will give your designs a unique style and look. A design is never fully complete without a unique graphic that represents your company or brand in the best way possible. An easy way to improve the style of your graphic designs is to start with a gradient in the primary color of your design and experiment with other colors to get the right style for your graphic. Q: Batch Execute : piped I got a batch file that run a program : @ECHO OFF REM This batch file will run a litte script C:\Program Files (x86)\Blender2.79\bin\blender.exe -D -P -n -b "" "C:\temp\documents\pics.blend" PAUSE But the problem is that the program spammed me with error as it's all piped but I don't have any errors when running it with a single argument. Even if it's something like that (the bolded part is the piped command) : REM This batch file will run a litte script blender.exe -D -P -n -b "" "C:\temp\documents\pics.blend" The same result (no errors, running it with a single argument) A: You need a /C option to close the pipe once the command has finished (you don't want to confuse the next command in the stream with the last). The correct way is: blender.exe -D -P -n -b "" /C "C:\temp\documents\pics.blend" (removing the PAUSE command). The Fast And The Furious. Brian Orakpo and Brian Dawkins are retired and the two are both working with the Wildlife Assistance Volunteers to build an orphanage in Tanzania that will provide housing for 120 children. "For me there's a whole other feeling when you see the kids," Dawkins said. "You see it happen in your lifetime. I'm making a difference in that very quick." Orakpo is also working with the Wildlife Assistance Volunteers to build an orphanage for 120 children. "Sometimes I look at these animals and I'm so sad that they are. I'm so happy that we're in the position that we're in now," he said.
