Ultrasound imaging evaluation of the eustachian tube by a new ultrasound mirror and a gel-like agent. To evaluate the ability of a new ultrasound mirror and gel-like agent to visualize the eustachian tube in routine clinical use and to determine the eustachian tube's width at the isthmus in children with non-secretory otitis media (OSM). Fifty patients with clinical diagnosis of non-secretory OSM were examined. The following imaging methods were evaluated: A conventional b-mode ultrasound, the new ultrasound mirror device and a latex lubricated gel-like agent. Ultrasound images were stored and measurements were performed. Then a repeated examination was done with the same imaging technique using a new gel-like agent. Values of eustachian tube width were compared between the methods using the Wilcoxon test for paired samples. The proportion of measurements of the eustachian tube's width between 0.30 and 0.50 mm was significantly higher in the gel-like agent method than in the conventional ultrasound technique ($P = 0.028$) and with the ultrasound mirror device ($P = 0.006$). The proportion of measurements of the eustachian tube's width between 0.51 and 0.70 mm was significantly higher in the gel-like agent method

Q: Apache Tomcat connector for Apache ActiveMQ I am trying to use apache tomcat connector for ActiveMQ. I am getting a URL config error as mentioned in the below image. I am attaching the access logs also if some one can help here. I am setting up the apache tomcat 7 connector (network=http) in my ActiveMQ server. Please guide me on what am I doing wrong here? A: You are doing it wrong. I am guessing that you are following an online tutorial. You should look at the ActiveMQ tutorials and not follow a random video. You should look at the sources and not the video. If you are using Maven, you should read and use the mvn install command. This will generate all the dependencies required. Then you should follow the ActiveMQ tutorial for Tomcat. If you are not using Maven, you should look at the sources. This is assuming you are working with a simple Tomcat connector. How to configure a simple Tomcat connector were added to 2×10^6 PBMC, *i.e.*, 16.8 μ l of the b7e8fdf5c8
