Handy - Tool to convert Currency - Free download at GetPCSofts.com Description: Handy is designed for the Chinese people to do Chinese conversions between Currency and Renminbi. Sample conversions are as below: 1 USD = 4.7 RMB; 0.3 USD = 3.8 RMB; 0.15 USD = 0.8 RMB Other conversion calculations can be performed by the user without the need for an Online Currency Conversion. Handy includes ten conversion functions that cover the most common currencies around the world. The functions can be used with large numbers of standard and non-standard currencies. All values are displayed in RMB at year 2004 exchange rate. Handy will take into account the changes in the exchange rate. With the new release, the functions are now synchronized with the main international currencies. Simple to use Handy has an easy-to-use interface. Enter your values, select the unit type and convert. Free web browser The application downloads a user interface that is embedded in the Handy. The browser will display the useful web pages of the website to the user. Handy is designed for the Chinese people to do Chinese conversions between Currency and Renminbi. There are ten conversion functions that cover the most common currencies around the world. Other conversion calculations can be performed by the user

What's New In Qonverter?

You can apply basic functions from various mathematics branches (algebra, trigonometry and logarithms) and design your own equations using the integrated editor. You can browse a comprehensive list that includes acceleration, area, digital information, torque and velocity, choose your desired units and easily convert them. In addition, this handy application provides you with a currency converter that is kept up-to-date by using European Central Bank definitions. Although the aforementioned tool supports a wide variety of currencies, unfortunately you cannot define custom values or create new entries. Basic variable, constant and function editor that allows you to modify existing records or create new ones, according to your needs. You can view items in a detailed list that displays details such as name, value, type and a brief description. Content can also be filtered by several criteria. What's New: Version 1.5.2: Added information about how to customize the currency conversion rate for currency Europe/European Union Version 1.5.1: Bug fix: Fixed an issue where the currency-conversion rate for some countries would sometimes not change. Version 1.5: Added information about how to customize the currency conversion rate for currency Asia/Pacific Version 1.4.2: Fixed an issue where the use of formulas would sometimes crash the application Version 1.4.1: Fixed an issue where the application might crash when opening from the file dialog. Version 1.4: The app is now better suited for Laptops. Now you can even open it with no mouse or keyboard interaction Version 1.3.1: An issue was fixed where the app would crash while selecting another country and trying to view the currency-conversion rates. Version 1.3: An issue was fixed where switching between the currency converter and the value calculator would not always work. Version 1.2.1: Fixed an issue where opening the app from the file dialog would crash the app. Version 1.2: A couple of small bugs were fixed. Version 1.1.1: An issue was fixed where the app would sometimes crash while converting currencies. Version 1.1: Added the following functionality: Conversion rates are now recorded when switching from one country to another. The currencies displayed on the currency converter page will now update automatically. Improved text readability. Added an option to easily sort the list of currencies. Added options to hide or show the converted value on the left side of the

System Requirements:
