It also supports the mobile version for iOS and Android systems. Other operating systems such as OS X and Nintendo Switch, however, are not playable by the PC version, which is the only gameplay version on these systems. FIFA '94, the first title in the series, was released in early 1994. The third title, FIFA '99, and its expansion pack FIFA '99 International, were released in early 1999. FIFA 2000 was released in early 2000. FIFA 2001, another expansion pack, was released in the late 2000s. The series then went dormant until 2007, when FIFA 08, developed by EA Canada, was released in August 2007. The FIFA series follows the rules of association football as set forth by FIFA, the international governing body of the sport. be published by EA Canada, following the purchase of the franchise by Electronic Arts. The game featured ground breaking gameplay. Two teams could score at once, and the players' hair could now be styled to match their national team colours (this feature was completely removed for FIFA 99). The game was a commercial success, and currently holds a 97% on review aggregator website Metacritic. The most common criticisms of the game are in regards to the way it plays football. The passing is too easy to predict, the skill moves are too simple, and the scoring is a little too easy to execute. However, the game is popular for being a true representation of the sport. It includes features
