FIFA 22 also introduces “Cougar Vision,” a new match feature that sees the opposition team's defenders appear to run back into their own half when they lose possession. Finally, FIFA 22 also adds a comprehensive update to FIFA Ultimate Team (FUT), providing new features and function, in addition to a host of real-life brand enhancements from adidas, Nike, PUMA, and others. Game Features All-New Player Data and Improved Player Visuals Players who appear in numerous real-life matches over a period of time are featured in the FIFA 22 game in detail never

before possible. Players are evaluated, in a variety of different real-life conditions, to give players a more accurate portrayal of their abilities. Players will be evaluated in a variety of real-life situations, with new training drills intended to provide coaches with even more information about how a player will perform in their new position. Characteristic animations have been improved throughout the entire player model, with faster, more realistic movements enabling players to recreate the life of the real thing. A new Procedural Player Shape System has also been introduced to the player model, with over 130

possible body shapes, which allows players to closely model their real-life bodies. Meanwhile, personal appearance features provide players with more customization options, such as hair, shoes and facial hair, for a more accurate recreation of their real-life personalities. Real-Life Goalkeepers Goalkeepers, like everyone else, are evolving in their game. The new Goalkeeper Vision System makes it possible to see a goalkeeper's line of sight, which is another important part of goalkeeping. The Goalkeeper Vision System also creates a seamless transition between the goalkeeper and the outfield players, making it easier

to feed off of what the Goalkeeper is seeing..K.G.R., and J.F.F.; supervision, A.H. and D.S.B.; project administration, G.B. and F.C.F.; funding acquisition, G.B., A.H., A.V., D.S.B., and F.C.F.
