Hey guys, I was going through the eBook which is usually larger than the online version which you can usually download from the Amazon website without paying anything. I bookmarked a few pages for later reading. Please let me know if someone can link me to the eBook. noun 1. a receptacle designed to receive and convey a sweet liquid from one container to another. verb 3. to place or set in a particular place. verb 4. to pay the expenses of; subsidize; support. 5. to receive (a gift) or offer (a gift). 6. to supply with something that is needed or desired. 7. to prepare (dough, batter, cookies, etc.) before use; form (batter, dough, etc.) into desired shape. Source: Merriam-Webster.com A: Your sample texts are not actually the same books, they differ in several respects. The first text is "Green Engineering: methods and practices for sustainable plant production" by Mehmet Koseoglu (2012), the second is "Handbook of Cane Sugar Technology" (2015) by R.B.L Mathur. I looked up both books, the Book in question is called "Handbook of Cane Sugar Technology" by R.B.L Mathur, I cannot find the one you mention. A: This is a partial answer, but I think it may explain your problem a bit. Your book seems to be about cane sugar, and I don't see anything about that in the text. The book you cite is about beet sugar. Sugarcane is the botanical term for the sugar cane plant, and it's quite different from sugar beet; generally speaking. Sugar cane is a grass; sugar beet is a beet; and beet sugar is a different substance than cane sugar. When you see "cane sugar" it usually means beet sugar is derived from cane sugar. So I can't see any way to meaningfully translate the title of your book, into the English language. Sorry. Q: Is it possible to load DB from a previously running app? I currently have a pre-installed app on my phone (Android Jelly Bean). I want to use that DB in my new app that I'm developing. So, is it possible to load the DB from the pre-installed app? If yes, can anyone
