Ultra Port Scanner Crack+ License Key

Ultra Port Scanner (Universal Port Scanner 1.8.2.1) Ultra Port Scanner, developed and published by software-booster, is a free and open-source utility for scanning an IP address or range. The program does not need to be installed as it is a portable software. What is new: Minor improvements and bug fixes. Ultra Port Scanner Features: Users can easily scan an IP address or range, as well as various port parameters. By using this program, you can check your website's open ports, as well as those of other hosts on a certain IP. Users do not need to view all results, as the program gives detailed information to all open ports, along with the number, status, and total number of closed and open ports. Ultra Port Scanner will not affect your system, as it works on the lowest CPU and RAM requirements. Ultra Port Scanner is a free tool and includes no adware or toolbars. No changes have been made in terms of its functionality since our last review. Ultra Port Scanner Setup: Users start with the installation. No further steps are required, since the software is a portable utility. After the installation, users can start the scanning procedure. Upon success, the program will provide detailed information on all open ports in the targeted IP address. Ultra Port Scanner Screenshots: Ultra Port Scanner System Requirements: The system requirements for Ultra Port Scanner are as follows: Note: This is a complete list of requirements. Not all programs or hardware require all features. OS: Windows XP/Vista/7/8/10; Important Notice: We can not guarantee that the information on this page is 100% correct. SoftwareInfo.com has taken great pains to compile this list, but there is always the possibility of an error. VN:F [1.9.22_1171] Rating: 5.0/5 (3 votes cast) Ultra Port Scanner, 5.0 out of 5 based on 3 ratings Ultra Port Scanner (Universal Port Scanner 1.8.2.1) by software-booster Ultra Port Scanner, developed and

What's New In?

Ultra Port Scanner is a powerful tool that can scan for open ports on a specific IP address or network. Ultra Port Scanner can scan on a small range of IP addresses or on a large address range. Ultra Port Scanner has built-in proxies and firewalls, so it can collect all data. It can also scan each port on a single IP address or from the entire network. Ultra Port Scanner can be setup in minutes, and once set up, the scanning can be performed in minutes. Ultra Port Scanner is a great tool for network security professionals, network and system administrators, hardware and software engineers, programmers, and anyone who is involved in information gathering. Ultra Port Scanner is a fully featured port scanner for any TCP or UDP ports. Unlimited port scans are just a click of a button away! You can even scan from a web browser or mobile device. Powerful multiple scan options allow you to quickly scan using multiple scan methods. For example you can scan locally, remotely, or a range of IP addresses. You can also scan any TCP or UDP port by specifying the port number, start and end port, IP addresses and ping times for each probe. Ultra Port Scanner has all this and more. It's simple to use yet powerful and comes in standard and extended versions. Installation is a matter of downloading and extracting the ZIP file to your computer. You also get an extensive help file containing a list of command line options and the ability to customize the tool by defining new scan options. Ultra Port Scanner Features: * Unlimited scanned IP addresses * Unlimited scanned ports * 10 scanned ports per IP address * TCP and UDP port scanning * Allows local and remote scanning * Ping scanning * Time interval * Inbuilt IP, ICMP and ARP proxy support * Automatic port mapping * Possibility to specify custom port ranges * Results file generation in CSV, HTML, XML and JSON format * Scan results view (list of IPs and ports) * User can stop and restart the scanning process at any time * Supported operating systems : Windows 7, Windows 8, Windows 8.1 and Windows 10 * Standard and extended editions * Advanced Help file * FREE support * No additional software installation required What I Love: * Unlimited scanned IP addresses * Unlimited scanned ports * TCP and UDP port scanning * Ping scanning * Time interval * Inbuilt IP, ICMP and ARP proxy support * Automatic port

System Requirements For Ultra Port Scanner:

Memory: Minimum of 8 GB, but we recommend at least 16GB RAM. CPU: Intel Core i3 7100, AMD Phenom II X4 945, or comparable. Graphics: Nvidia GeForce GTX660 with 2GB Video RAM or AMD Radeon HD 7770 with 2GB Video RAM. DirectX: DirectX 11 Storage: 20 GB available space. Additional Notes: The game will run at 30fps in HD, the consoles at 60fps. There are no tricks to enable higher than 60
