баш баарыны буудай бекк эсуш.Q: JQuery slide from down to up then back to down, then repeat I'm trying to have an image with some content slide up from the bottom of the screen and then slide down to the bottom of the screen again, using jquery. However, I don't want the content to slide all the way up from the bottom, but stop when it is half way there. It needs to slide back up to the bottom, but not do a second loop to the top. It needs to be done several times. Here is what I have so far:

```
$(".slide").click(function() {
    $(".content").stop().animate({ bottom:
    "-=100%" }, 2000).delay(800).animate({
        bottom: "0%", },
        2000).delay(1000).animate({ bottom:
    "100%", }, 200).delay(1300).animate({
        bottom: "-=100%", },
        2000).delay(1000).animate({ bottom:
    "0%", }, 2000); });
```

A: The main problem is, your first.animate() function is sliding back

up to the top, before you slide it down again. You need to set the \$('html, body').stop().animate(..., ...) after your first.delay(...). Then you need to start the animation from the bottom again.

FManTX, try asking in #bash just started using Ubuntu, but i am confused how to install updates, I am using ubuntu 17.10 fresh install
