Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. However, if your computer is rather new (i.e. the Internet is slower than it was when you were using Windows XP) and you have a fast Internet connection, then this game is perfect for you. Roblox is designed with in-game advertising, izi-reveals, social integration, and many other features. Roblox allows users to join "Creator" channels where they can publish and share their creations. Users may subscribe to channels as a way to be notified of new creations. Other users can visit a "Gamer" channel to watch a live feed of the current game being played by the channel creator. Roblox helps players become more active by rewarding them with virtual rewards for being active. This has been criticized by advocates of altruism as encouraging players to engage in social activity merely to receive in-game points. Roblox is free to play but has optional in-game purchases using the Robux virtual currency. Its official website has an interactive character generator that allows players to generate avatars to use for games and a web editor to design themed rooms and place decorations inside their games. Roblox has a Terms of Service and a Privacy Policy. Roblox's Terms of Service is free to read and there is a community formed for parents to discuss using Roblox. As of 2019, Roblox's official website also features a blog that provides news on the latest Roblox technology updates as well as game development stories. Like
